

Human energy™

Chevron is one of the largest integrated energy companies in the world, conducting business in around 180 countries and engaged in every aspect of the oil and gas industry, from exploration through refining to power generation.

Chevron's Australasian interests are managed from its Perth office. In 2007, Chevron's Australian presence will be boosted by the addition of a satellite office of Chevron's Energy Technology Company (ETC) which provides research, development and technical services to support the company's worldwide operations. Chevron Australia produces oil, condensate, liquefied petroleum gas (LPG), natural gas for domestic use and liquefied natural gas (LNG) for export. Committed to further exploration and development of the country's hydrocarbon resources, Chevron Australia is poised for growth.

Graduate Recruitment Program 2007

With Chevron Your Options Are Endless

A career with Chevron gives you the chance to create the job you've been dreaming of. If you're ready for a challenge - and you want to believe in your work and truly make an impact - explore what the 2007 Chevron Australia Graduate Program has to offer.

Our five-year competency-based *Graduate Development Program* has been designed with your needs in mind. We have an open and collaborative culture in which graduates work closely with experienced colleagues as they rotate through our project teams.

We provide a high level of training for rapid career growth and encourage development through our global placements.

Graduates with a minimum Bachelor (Hons) will be drawn from the following disciplines:

- ▶ Petroleum Engineering
