Junior Programmer

- Rare opportunity to work with a dynamic, intelligent and committed team of professionals in an international company that's making a big difference in the book industry
- At the company's head office in Claremont, WA

About us:

Ebooks Corporation is a public company that has specialised in the production and distribution of digital books since 1997. The company has offices in Australia (Perth & Melbourne), the US and the UK, and partnerships with 360 publishers, including all of the world's largest trade, professional and scholarly publishers.

The company distributes ebook titles to consumers around the globe via the retail portal (www.eBooks.com) and to academic and research institutions via EBL (www.eblib.com). Ebooks Corporation also provides technology services to global book publishers and retailers.

EBL is an innovative ebook acquisition and lending platform that a serves large university libraries and specialised research libraries all over the world. We integrate with these libraries using various technologies. EBL has partnerships with leading book distributors in the US, UK and Australasia.

SKILL SET

The successful applicant will have:

- A can-do, innovative problem solving approach
- Good analytic skills and professional acumen
