THINKSMART

Roles	2 x Microsoft .NET Programmers
Company	RentSmart is a product of one of Australia's leading finance companies, ThinkSmart, whose products successfully bridge the gap between a credit card and a bank loan for delivering a fast, simple finance solution for businesses.

RentSmart's rental finance facilities are now available in more than 1,000 retail outlets around Australia, including Myer, Megamart, Officeworks, Dick Smith Electronics, David Jones, Next Byte and Harris Technology.

The success of the RentSmart system in Australia recently paved the way for a $200 million joint venture with one of Britain's oldest financial institutions - Halifax Bank of Scotland - to provide similar services in the UK. Now a growing number of overseas businesses are getting their IT and office equipment with RentSmart.

RentSmart uses innovative technology to provide the customer with the convenience of finance at the point of sale, creating a service that has won the company an iAward from the Australian Information Industry Association and has earned RentSmart 's founder and managing director, Ned Montarello, the title of Australian Entrepreneur of the Year.

Founded in 1996, ThinkSmart already has more than 100 employees in Australia and the UK, and the company's dynamic growth rate has seen it ranked in Business Review Weekly's fastest growing 100 companies every year since 2000.

ThinkSmart is headquartered in Perth with its European operations based in Manchester, England.

ThinkSmart is a privately held public company with shareholders that include the ANZ Bank, Australian Capital Equity, Heytesbury Group and Ned Montarello.

Role Description	Successful candidates will be working on green field development projects using industry leading methodologies and technologies.

The projects will develop enterprise systems in n-tier architectures that will be deployed to international clients.
