

Call for Western Australian Industry to benefit from Science and Innovation Studentship Awards

\$7,000 in Innovation Support

The Office of Science and Innovation (OSI) introduced the **Science and Innovation Studentship Award** to promote innovation in industry by sponsoring tertiary students to undertake research projects of interest to companies. This year up to 20 Studentships will be awarded.

Successful students work full-time with a Western Australian company of their choice in collaboration with a local University on a specific research project for a period of ten weeks over the University summer break. The OSI will fund the student \$7,000 to complete the project.

In addition to gaining the benefit of the research, at no cost, host companies also have the opportunity to form or strengthen ties with research institutions. Furthermore, Studentships attract outstanding students, and will contribute to many successful outcomes for WA companies.

By providing us with details about a proposed project, the OSI can match your company with a student from a relevant discipline. Alternatively, you can contact a University student directly, and ask them to contact the Scholarships Officer at their University.

Further information about the Studentship Awards can be found on the OSI website: www.scienceandinnovation.dpc.wa.gov.au

If your company is interested in hosting a Studentship, then please complete the Expression of Interest form attached or on our website. Your information must be received by this Office on or before Friday 24th June for it to be registered on the Host Organisation database.
