# Graduate IT Careers

Wesfarmers is a major diversified industrial company with business interests in home improvement retailing, coal mining, gas processing and distribution, industrial and safety product distribution, chemicals and fertilisers, insurance and rail transport.

## Business Analysis Stream - 2007 Commencement

Are you ready to start a diverse business career and develop to your full potential?

Our 3 year Graduate IT Program is designed to give you valuable 'hands-on' experience. You will benefit from successive job placements within a number of Wesfarmers' WA-based businesses along with professional training and developmental opportunities.

Within the Business Analysis stream your role could include:

- Analysis of business processes and workflow
- Identifying areas where business efficiencies could be improved through the application of IT solutions
- Data and process modelling
- User support

As it is vital that our graduates gain a broad understanding of IT in the business environment, you may also be exposed to a broad cross-section of IS disciplines.

To be considered, you must be completing a Computer Science degree, or a Business-related degree with an IT focus, by end 2006 or mid 2007. You must be able to demonstrate strong interpersonal and communication skills, well developed teamwork and organisational skills, and take an analytical approach to solving problems.

Previous work experience and exposure to customer service would be well regarded.

This is an exciting opportunity to join a successful diverse organisation with scope for ongoing professional and career development.

To apply, visit [www.wesfarmers.com.au/graduates.asp](http://www.wesfarmers.com.au/graduates.asp). Applications close on Monday 25 September 2006.
