

Texas Instruments
Scientific Calculator

TI-30 SLR

The student's slide rule calculator that never needs batteries.

The light-powered version of the TI-30-II, the TI-30 SLR Calculator will never fail you during an exam. Sunlight or electric light will keep your calculator working, indoors or out. Put it in your pocket or briefcase and it turns itself off automatically. Features include:

- AOS™ algebraic operating system
- 8-digit display
- Scientific notation $5 + 2$
- 15 parentheses levels
- 4 max pending ops.
- Constant
- Memory, store/recall
- Sum to memory
- Exchange display with memory
- Log, Ln x , 10^x , e^x , x^2 , \sqrt{x} , y^x , $1/x$, $x!$ and %
- Sin, cos, tan and inverses
- DRG conversions

TI-30 SLR. All the power you need to meet the advanced algebraic and trigonometric challenges of higher education

The TI-30 SLR combines the affordability and portability that today's students demand in one powerful unit that makes problem-solving easy. It performs the most-needed slide rule functions . . . at the touch of a key.
