TI-30 STAT

Scientific calculator for junior and senior high school students

TI-30 STAT

For junior and senior high school students—easy-to-use scientific and statistical functions.

The TI-30 STAT performs 54 of the most used scientific and statistical functions and is designed for use by junior and senior high school students.

It's simple and easy to use because the AOS™ operating system lets you enter problems from left to right, just as they are normally stated.

The TI-30 STAT performs common and natural logarithms and antilogarithms, reciprocals, powers, roots, factorials, and trigonometric calculations, including inverses, in degrees, radians or grads.

Statistical functions include mean, standard deviation, and variance for both sample and population data.

Constant Memory™ feature retains a number in the memory even when the calculator is switched off.

Numbers can be entered and results displayed in either floating decimal or scientific notation (for very large or very small numbers). The LCD display shows 8 digits or 5 digits and a 2-digit exponent.

APD™ feature automatically "powers down" the calculator if no key is pressed for 15 to 35 minutes. So if you forget to switch it off, the TI-30 STAT remembers—and saves your batteries.

Carrying case also has a pocket for a quick reference guide.

Specifications

Display: 8-digit or 5-digit with 2-digit exponent
Size: 5.3 × 2.9 × 0.35 inches
Weight: 3.5 ounces
Power: Up to 1,000 hours operation with two "button-cell" batteries.

Special features:

- Designed for junior and senior high school students.
- Performs 54 most-needed scientific and statistical functions.
- Easy-to-use. AOS™ operating system allows simple, straightforward problem entry—from left to right, just as problems are normally stated.
- Scientific functions include common and natural logarithms and antilogarithms, reciprocals, powers, roots, factorials, and trigonometric calculations, including inverses, in degrees, radians or grads.
- Statistical functions include mean, standard deviation, and variance for both sample and population data.
- Floating decimal or scientific notation.
- Constant Memory™ feature retains a number even when the calculator is switched off.
- 8-digit or 5-digit/2-exponent display.
- APD™ feature automatically "powers down" the calculator if no key is pressed for 15 to 35 minutes—and saves batteries.
  Carrying case also has a pocket for a quick reference guide.

Limited Warranty

The TI-30 STAT calculator is covered by a one-year limited warranty against defects in materials and workmanship. The full text of this warranty is published in the quick reference guide accompanying the TI-30 STAT.
