

*Because
you
shouldn't
have to
draw
anything
twice.*

ALL OF THE DESIGNER'S STUDIO— ON THE DESK TOP

Software should be a tool to help you create—and leave time for inspiration. Now the Corvus Concept Personal Workstation incorporates such a tool: Paint.

Paint is a versatile drawing program that works like a box full of brushes for the designer, artist and illustrator. With Paint, you'll seldom have to draw anything twice. Paint gives you more time to do what you do best: design and create.

Paint lets you enlarge or reduce vector drawings or repeat patterns on the Concept screen. It includes an amazing feature, "Picture Undo." Save a backup copy of your drawing with Picture Undo. Then continue changing and correcting your picture on the screen. If you don't like the changes, you can erase them altogether and start over. It's the perfect tool for in-house and school art departments, design studios, architects, typesetters and publishing houses.

Paint is easy to use. One or two easy keystrokes control all functions. As easily as using a pencil and sketchpad, you can draw electronically by combining keystrokes with an optical mouse and graphics pad.

VARIETY OF GRAPHICS TOOLS

Paint includes more than 200 commands and functions in a general graphics "art bin." Graphic effects include a variety of dots, brushes, ribbons, lines, blocks, shades, patterns, fills and more. With features like Copy-brush, only your imagination limits your design choices. Copy-brush lets you take anything on the screen—pattern, symbol or shade—snap a graphic "box" around it and transform it into a new brush. Copy-brush mixes a palette of brushes and shades that you can pick up at any time and use to paint.

THE BEST OF THE CORVUS CONCEPT

Paint takes full advantage of the Concept's powerful MC68000 processor and high-resolution display on the full-page screen. Paint uses a variety of function keys and easy-to-read labels in plain English.

Once your Concept is part of the Corvus OMNINET—local area network, it can share data and processing, software and printers with 63 Concepts or other brand microcomputers and peripheral devices.

SPECIAL FEATURES

Picture Save	<i>Creates a portfolio of sketches, saved in computer memory.</i>
Tape Recorder	<i>Repositions, scales or saves graphic sketches in computer memory or your hard disk.</i>
Add Text	<i>Adds text anywhere in a picture.</i>
Replication	<i>Duplicates a design within a larger, predefined area.</i>
Random Airbrush	<i>Randomly generated points spray at the cursor's location, becoming darker the longer the key is held.</i>
Rubberbanding	<i>Precisely draws lines, boxes and and parallelograms.</i>
Scaling	<i>Scales brushes using the Concept's cursor keys.</i>

OTHER FEATURES

Several cursor types and sizes.

Direct printing of screen displays on a dot matrix or laser printer.

Choice of nine character fonts.

Graphpaper grid of any size that controls the cursor's movement.

Degrees of shading.

Lock-X or Lock-Y coordinates for positioning.

Suggested retail price for Paint is \$395. Purchase the optical Fieldmouse and graphics pad (1B-1-P3) from Mouse Systems Corp.
